

7 GENERAL

The **ALMAGHP** is an electromagnetic flowmeter designed to measure the flow rates of conductive liquids in applications with high operating pressures. The robust design of the ALMAGHP allows it to be used in applications with pressures in excess of 6000 psig (42 Mpa). Line sizes ranging from 1" to 8" (25 to 200 mm) can be accommodated by the ALMAGHP, with available process connections including ANSI, DIN, and JIS-type flanges. A wide selection of options are also available including integral or remote mounting, 110-220 V_{AC} or 17-26 V_{DC} power, and HART, RS485 & Profibus communications. The ALMAGHP's unique ability to withstand high pressures, combined with its wide array of available features, makes it an ideal choice for conductive fluids. The ALMAGHP has been successfully used in high pressure application mainly in the oil and gas industries, and a variety other of industrial high pressure applications.

7 FEATURES

- ▣ Various liner/electrode material combinations can be selected in order to achieve chemical compatibility with different fluids.
- ▣ Capable of measuring fluid velocities of up to 10 m/s, with a high turndown ratio.
- ▣ A variety of flange styles including ANSI, DIN, and JIS are available.
- ▣ Suitable for high pressure operation in excess of 6000 psig.
- ▣ IP68 protection for submersible operation is available for the flow tube.
- ▣ Available FEP liner suitable for vacuum conditions.
- ▣ Excellent accuracy; $\pm 0.5\%$ of reading standard
- ▣ Diagnostic features alert the user to empty pipe or reverse flow conditions.

7 SPECIFICATIONS

● Size	: 1" ~ 8" (DN25 ~ DN200)	● Electrode & Grounding	: Stainless Steel 316L Hastelloy B, Hastelloy C, Titanium, Tantalum Tungsten Carbide
● Measuring Range	: 0.3 - 10 m/s	● Ambient Temperature	: -13 to 140 °F (-25 to 60 °C)
● Pressure	: 87-6100 psig (0.6~42 Mpa)	● Protection	: IP 65 - std IP 68 (Submersible) - only for remote
● Process Connectio	: ANSI Flange - std JIS, DIN Flange - opt	● Conductivity	: must be > 5 μ S/cm
● Accuracy	: $\pm 0.5\%$ of reading (fluid velocity ≥ 0.5 m/s)	● Grounding Resistance	: Must be $\leq 10 \Omega$
● Materials		● Power requirements	: 19-36 V _{DC} , 12-15W 85-265 V _{AC} , 45-63 Hz, $\leq 20W$
Measuring Tube	: Stainless Steel #304	● Outputs	: 4-20mA, Pulse,
Flange	: Carbon Steel (standard) Stainless Steel #304 (Optional) Stainless Steel #316 (Optional)	● Communication	: RS232/485/HART, Modbus
Coil Housing	: Carbon Steel (standard) Stainless Steel #304 (Optional) Stainless steel #316 (Optional)	● Display	: Flow rate, flow velocity, percentage, Total flow
Liners	: Polyurethane, FEP, PTFE	● Temperature	: 14 ~ 140 °F (-10 ~ 60 °C) - Polyurethane -40 ~ 356 °F (-40 ~ 180 °C) - FEP -40 ~ 356 °F (-40 ~ 180 °C) - PTFE
● Enclosure	: IP67 ATEX, CSA and FM

**** Please contact your local Smart Measurement application engineer**

You also need to provide the following information:

Type of Fluid	Please provide the name of your fluid
Full Scale Flow	Maximum and minimum flow rates, units must be in GPM, LPM or m ³ /hr, etc..
Line Size	Please provide pipe size as well connection type (flanged, threaded, etc..)
Pressure & Temperature	We will calibrate your flowmeter as close to your operating conditions as possible
